

ADA INSTRUMENTS

LASERMARKER 70

laser receiver

Operating range of 5 to 70 meters

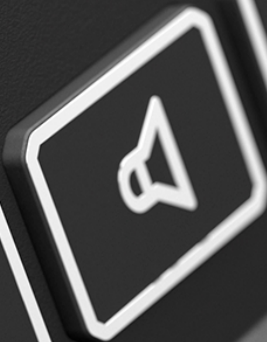

When using a laser receiver, the
working distance is doubled.

Detects green and red laser beams

Receiver performance does not
depend on the color of the laser line.

LASERMARKER 70
laser receiver

**Programmed for any
line laser with receiver
mode**

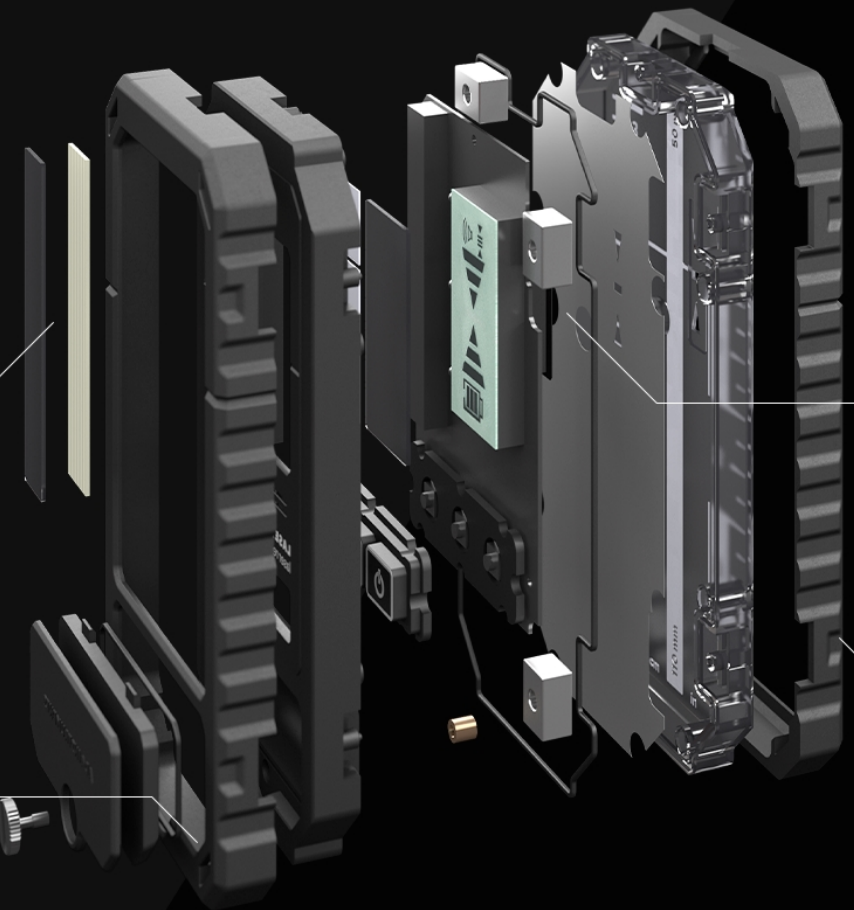

Manual adjustment to any line laser and
saving the settings in the receiver's
long-term memory

ADA INSTRUMENTS

**LCD display,
LEDs, sound**

Detection signals are indicated by pictograms on the display and accompanied by sound and bright LEDs

**Confident reception -
increased size of the
photocell**

Detects a wide laser beam over
a long distance

**Rubber armor belt with
shock-absorbing
dampers**

Maximum protection in case
of bumps and falls

**Built-in
magnets**

Reliable attachment to metal
surfaces when marking.

**Protected
housing**

Protection class IP 54 against
moisture and construction dust

Coarse and fine mode of detection: +1mm or 3mm

Selectable accuracy depending on range and light conditions

Laser target

Two-in-one: receiver for long-distance and laser target for short-distance operations.
